

## UPGRADE

PlugStation earplug dispensers

**Now even more sustainable, cost effective and hygienic**

Moldex PlugStation earplug dispensers make it easy to provide hearing protection in a striking way. For 2022, we have revised and expanded this popular product range. The focus is on two important topics of our times: sustainability and hygiene.

### Refillable

All PlugStations from year of manufacture 2022 onwards can be opened and refilled with our new Refill Packs. This saves 92% plastic with each refill.

### Magnetic Bracket

In addition to our screw-on bracket, we now offer a version with six strong neodymium magnets for a secure hold on metal surfaces.

### PlugStation TouchFree

The sensor-controlled, battery-operated dispenser distributes one pair of earplugs at a time. Touch-free, for maximum hygiene.

### PlugStation Antimicrobial

The turn handle with CuVerro® V copper surface kills more than 99.9% of bacteria left behind during use.<sup>1</sup>

## PlugStations and Wall Brackets [EN352-2:2002]
