BETA'S ICONIC WRENCH

A stylish, slim shape enhanced by a slender profile, lighter to the touch.

The strength, resilience and ergonomic design of the Beta wrench reach even higher values, to provide users with the best possible tool. The manufacturing process is carried out in our factories in Sovico and Sulmona, on the basis of state-of-the-art automation technology and the best trained workers.

ERGONOMIC

The offset ring has a 15 degree angle to protect the hand. The shape is obtained from a die; it is not bent later.

POWERFUL

Torque values more than doubled compared to the requirements to be satisfied under ISO 1711.

STRENGTH

Remarkable strength: in case of improper use, the wrench buckles, without breaking suddenly and dangerously.

BETA'S RANGE OF RATCHETS

NEW

BETA'S RANGE OF RATCHETS HAS BEEN CHANGED AND EXPANDED: CHOOSE THE MODEL THAT SUITS YOUR NEEDS BEST!

Ratchet with up to **72 teeth**: take-up angle of **5°** for jobs in small spaces. 17-tooth serration, including 11 always in grip.

Minimum head size for easier access. Phosphated square drive.

One-handed reversal.

Hand pressure on the ratchet head does not cause any accidental reversal or release of the socket.

The versions with 1/2" and 3/4" square drives rely on approximately 6% weight reduction, for optimal handling and increased ease of use, without affecting sturdiness or performance.

INNOVATIVE MATERIALS FOR TOP PERFORMANCE

New straight lever: the pressing process originates from a semi-finished product with a round cross-section, specially designed to minimise inner tension, thus resulting in optimal performance.

Heavy duty universal pliers with cutting edges made of sintered steel

- The decentralized pin allows the fulcrum to be closer to the cutting point, thereby resulting in an improved lever effect.
- Perfect alignment of the nose and the thin profile allow the pliers to be used in very small areas.
- The body of the pliers is made of a reliable molybdenum steel which has been heat treated in order to be flexible and resistant so as to guarantee a safe grip in any moment.

POWER TOOLS

Let us introduce our range, Beta Power Tools, which comprises reliable, durable work instruments designed to satisfy every professional's requirements. Beta's family of power tools comprises:

- **BATTERY TOOLS**
- **CORDED TOOLS**

The range of battery tools includes **20V** and **12V** high-performance machines.

We at Beta relied on these hallmarks to develop a comprehensive line of battery tools, ranging from the

high-torque impact drill to the impact wrench with 1/2" square drive. All of Beta's new power tools are equipped with brushless motors and first-rate interior mechanisms, for significantly improved performance and durability of the tool.

The impact wrench with a maximum unscrewing torque of **1200 Nm** is no doubt the flagship power tool of the new range, an ideal work partner for anybody who needs unparalleled power and performance.

BATTERY CHARGERS AND STARTERS

NEW

Since 2022 the established, authoritative welding specialist, Helvi, and Beta Utensili have been working together to develop ground-breaking technologies. This joint effort has translated into the new range of Beta by Helvi welding machines, which boast ultimate performance in line with its high quality standards.

Easy-to-use inverter welding machines with excellent welding characteristics for all types of electrodes. With overvoltage and overtemperature control and electrode anti-sticking function. Compact and lightweight, ideal for home maintenance jobs, light carpentry and maintenance jobs.

- Complete with 80 bar sensor (for low pressure)
- Connection via cable free sensor
- Measurement and software update download via Wi-Fi
- Shockproof case
- For use in combination with kits 1464 for testing engine pressure and compression

Beta's digital tester, 1464T, can be used to measure numerous parameters in the automotive industry. The 80 bar pressure sensor it is fitted with can be used to test pressure and compression in petrol and diesel engines as well as oil pressure, the low pressure common rail circuit, and perform several other tests.

The internal software can be updated via Wi-Fi connection. The result of the measurements is displayed on the 8" touch screen. Data will be represented graphically or numerically, depending on the test that is being performed.

Ultrasonic cleaning tank with special degas function

- Ultrasonic cleaning relies on fluid heating to effectively clean spare parts and metal pieces in general (carburetors, valves etc.)
- Digital display for temperature and cleaning time selection
- Two cleaning modes: "soft" and "normal"
- For normal cleaning, just use water at a temperature of 50/60 °C
- For more accurate cleaning, add non-foaming detergent solutions specific for ultrasonic tanks
- Using the degas mode speeds up air release throughout the tank, thereby improving ultrasonic cleaning efficiency

THE REVOLUTIONARY IMPACT WRENCH

NEW

THAT DOES NOT REQUIRE LUBRICATION

The impact wrench, 19270LS, fully designed, developed and ENGINEERED BY BETA UTENSILI, relies on the OIL-LESS system, a brand-new innovation in the pneumatic tool industry: it allows the impact wrench to operate without having to be periodically lubricated with oil, thus ensuring increased durability and high performance.

The painstakingly studied assembly, micrometer alignment of the interior parts and use of innovative first-rate materials result in a reduced number of failures, for lubrication-free lifetime use.

FitEvolution

Seven uniquely designed models, available in several colours and materials, ranging from mesh to microfibre, to satisfy the most demanding users' requirements.

THE PATENTED SYSTEM BETA FIT4YOU TO CUSTOMIZE COMFORT IN THEIR SAFETY FOOTWEAR.

After several years of painstaking studying and designing, we developed the patented system, **FIT 4 YOU**. This state-of-the-art penetration-proof insole pressing process allows three different **ETPU** inserts – each with different densities – to be combined, to provide three levels of comfort, thus satisfying every user's requirements.

The patented system, **FIT 4 YOU**, is based on 3 provided ETPU inserts, varying in density and colour, to allow the user to customize the shoe according to weight, height and personal usage requirements.

- Composite toe cap
- Composite fibre penetration-proof insole
- 3 ETPU inserts, with 3 different densities, for a customized shoe
- Heel stability support and traditional lacing.
- Dual-density polyurethane outsole
